Product description

DISCOVER PALPITATION

The **Palpitation** vibrating egg by Adrien Lastic is Designed for vaginal use and to massage all erogenous zones, such as the clitoris, nipples and glans. Inserting it into the vagina is very simple and it can be removed effortlessly thanks to the silicone cord at the bottom.

In addition, the Palpitation motor is very powerful, so you can enjoy smooth and powerful vibrations. You You choose between its nine function modes.

Its size makes it discreet, easy to transport and, despite having great power, it is silent. One of the most important points of **Palpitation** is the silky and pleasant touch it has, in addition, it can be submerged under water and experimented. This is achieved thanks to the silicone and ABS material with which it is made. manufactured.

Palpitation will become in the best ally, for you and your partner. With its nine vibration modes you can play and cause mischief at home or outside. With the new Adrien Lastic APP "AdLove", you can control the toy without any problem, in addition, there are many more possibilities in it, with the remote mode you will personalize your experience to the extent you wish. I took you. Control the vibrating egg from its own button or remotely without distance limits. Explore new sensations!

HOW TO USE IT?

To turn the vibrating egg into standby mode, press the button for three seconds. Next, in standby mode, from the Ad Love application you can control the different vibration modes, on the other hand, you can also control the vibration modes through the button. Palpitation.

Knowing this, you are ready to experience new sensations, and remember, don't forget to add a few drops of water-based lubricant when using the vibrating egg.
