Product description

Enzo feels like a real bargain for anal or vaginal satisfaction. Silky touch finished with suction cup base for hands-free pleasures.

A realistic dildo is a sex toy designed to imitate the look and, in many cases, the feel of a human penis. These toys are available in a variety of shapes, sizes and materials, and are commonly used for sexual stimulation, either alone or with a partner.

1. Shape and Design: Realistic dildos are characterized by their design that imitates the male anatomy. They have a phallic shape with details that include veins, glans, and sometimes even testicles. This realistic design seeks to provide a visual and tactile experience that resembles human intimacy.

2. Materials: These toys are made with body-safe materials. The choice of material can affect the texture, flexibility and temperature of the toy.

3. Sizes and Dimensions: Realistic dildos are available in a wide range of sizes and lengths to suit individual preferences. They can range from discreet, compact sizes to larger, more realistic models.

4. Couple or Solo Use: Although realistic dildos are commonly used for masturbation, they are also popular in foreplay and sexual activities as a couple. Some models are designed with a wider base or with suction cups to allow use on harnesses or to attach to smooth surfaces.

5. Care and Cleaning: It is essential to follow the manufacturers care instructions to ensure the durability and hygiene of the realistic dildo. Most of these toys are easy to clean with warm water and mild soap, and the use of water-based lubricants is recommended to avoid damaging the material.

FEATURES:

- Color: Flesh
- Material: PVC
- Dimensions: Length 21 cm / Diameter 4.3 cm
- Waterproofing: Waterproof-IPX8
- Stimulation area: Vagina
