Product description

The smallest love egg with AAA batteries on the market! Vibrating love eggs with ergonomic, compact, silent and multi-speed wireless remote control. Ideal for solo or couple pleasures!

A silent vibrating egg, with several speeds and remote control, is a sex toy designed to provide intimate and exciting pleasure, giving those who use it a unique and personalized sensory experience. This compact, egg-shaped device is designed Made with body-safe materials.

The main feature of this vibrating egg is its ability to operate discreetly, thanks to its silent motor. This quality allows stimulation to be enjoyed in quieter and more private environments, maintaining the privacy of the experience. In addition, its compact size makes it a discreet and easy-to-carry toy, perfect for carrying in a purse or travel bag.

The vibrating egg usually features various speeds and vibration patterns, allowing users to adjust the intensity of stimulation according to their preferences. These speed and vibration options provide versatility to suit different sensitivity levels and individual preferences.

The wireless remote control adds an extra layer of excitement and convenience to the experience. It can be used by the person wearing the vibrating egg or given to a partner to control the vibrations remotely, which adds a dimension of play and surprise. The remote control usually has considerable range, allowing you to explore new forms of intimacy and connection, whether in the privacy of your home or in more daring and adventurous situations.

Ease of cleaning and the use of water-resistant materials are common aspects of these toys, which facilitates hygiene and maintenance. It is recommended to follow the manufacturers instructions to ensure safe and long-lasting use.
