Product description

Morbidty is a human reality, that is, one of the basic impulses of the human being. It has to do with the instinctive part and is part of all needs, such as: eating, having sexual relations, socializing, sleeping, among others.

This feeling is a kind of force that drives people to come into contact with it and leads them to experience pleasure when doing so. The pleasure of doing something forbidden or breaking the rules.

Morbidty has different ways of expressing itself, among them is pornography; Viewing this type of content satisfies people's curiosity, but also allows them to take a step beyond common sexual relationships. That's why **ANBIGUO** is born, the first brand designed for sexual morbidty without limits!

Where the forbidden begins is morbidty and ambiguity. Without labels, without limitations and with a lot of passion we have developed this brand.

The **ARKADIO** range incorporates a set of functions never before seen in a penis stimulator: designed for high-caliber stimulation of both the glans and perineum. It has eight vibration modes, a super powerful motor and super soft silicone to the touch, in addition to being ergonomically designed for safe and comfortable use. It is perfect for both beginners and more experienced users. This massager will add a new dimension to your pleasure sessions, both alone and with others. In addition, it is compatible with the new Watchme remote control technology.

Characteristics:
