## BATHMATE - HYDRODOUCHE ANAL SHOWER

Price	<b>149.07 £</b>
Number	<b>70137111</b>
Producer code	<b>FETISHID-210440</b>
EAN	<b>5060140204800</b>

### Product description

Bathmate Hydrodouche offers the most innovative solution for all those men who want a larger penis size.

Thanks to the enormous potential of hydraulic force, Bathmate can exert greater suction power than its competitors, forcing the expansion of the corpora cavernosa and increasing your penis size in minimal time.

With Bathmate you can achieve a size increase discreetly and peacefully in the privacy of your bathtub or shower.

Manufactured with the best materials and with the highest quality to satisfy your needs. By using Bathmate we can get the extra length and thickness we have always wanted.

How is it used?

- 1) Fill the bathtub with water.
- 2) Once in the bathtub, place the Bathmate under water until it fills completely. The penis is then introduced inside and rests on the base of the pelvis.
- 3) Push the Bathmate towards you repeatedly. This operates the hydraulic contraction mechanism of the pump base, creating the vacuum effect. You will begin to feel the pressure increases. As water is evacuated from inside through the upper valve, the penis expands more and more.
- 4) Once you can't pump any more, simply rest for five minutes. The most optimal vacuum is when you can no longer expel any more water from inside the Bathmate.
- 5) Repeat the pumping operation every four or five minutes, rest and repeat the maneuver. It is necessary to repeat this operation, since in each compression cycle, there is a moment when no more water can be extracted.
- 6) Repeat the pumping operation every four or five minutes, rest and repeat the maneuver. It is necessary to repeat this operation, since in each compression cycle, there is a moment when no more water can be extracted.
- 7) If you feel the pressure is too strong, please release the top valve slightly. Remember to do it in water to prevent air from entering. After 15 to 20 minutes of use, reduce the pressure by pressing the pressure release on the top of the Bathmate. Then stand and see immediate results. You won't be disappointed!
- 8) It is recommended to use 15 to 20 minutes per session, three times a week for best results.
