### Product description

Do you want to maximize your potential? Bathmate is the ultimate brand in penis pumps, using water pressure to generate long-lasting gains in length and girth. It is patented under the name Hydro, one of the best-selling penis enlargement devices in the world.

Bathmate pumps are designed to be used in the bath or shower, offering a convenient and effective way to exercise your manhood, resulting in natural growth. The collection offers a wide variety of pumps, from classic models in various sizes to the Hydro X series, pumps with higher intensity and faster results. In addition to innovative hydraulic pressure pumps, Bathmate also sells a large selection of powerful cock rings, perfect for increasing durability and potency.

The Hydromax7 pump is the perfect choice for men who want to lengthen their penis and increase stamina. This pump keeps the penis in tip-top shape, increasing blood pressure for a more impressive erection.

The Hydromax7 pump is larger than the Hydro and has a soft seal and a very comfortable ring. This pump is designed for total comfort and the textured detail of the empty tube allows for easier control thanks to a great grip. This pump dilates blood vessels and the shut-off valve allows for one-handed filling for greater convenience.
