Price	**75.16 £**
Number	**70137197**
Producer code	**FETISHID-219423**
EAN	**5060140209041**

Product description

The Bathmate HydroVibe isn't just about improving the penis size and strength gains your penis pump provides; But it adds some useful vibrotherapy health benefits, helping you feel happier and feel better.

- It increases the release of natural hormones such as serotonin and dopamine, making you feel better and helping to combat negative feelings. By relaxing your muscles, it makes your orgasms much more intense.
- It increases blood flow and lymphatic circulations, particularly to the penis, making you feel less tired by filtering toxins from the blood.
- It helps release anti-pain chemicals like enkephalin, which adds an extra level of relaxation.
- 100% submersible
- USB rechargeable
- 10 vibration modes

Attaching around the bellows of any of our Bathmate pumps (other than the HydroXtreme11), the HydroVibe allows you to add an extra dimension to your Bathmate routine by using two VIBE Bullet vibrators. By adding vibration to the power of the water-based pump, you will be able to significantly increase blood flow to the penis, which will quickly increase the erection for even better size gains (while feeling great to use).

Completely made of body-friendly silicone, the Bathmate HydroVibe gives you access to 10 different vibration patterns, while the detachable IPX7 waterproof vibrators allow you to open a new side to your sex life.
