Sadomasochism is based on more than just feeling pleasure through pain. It is characterized by assuming the roles of dominant and submissive. The representation of these roles in non-sadomasochistic couples, within their erotic game and without taking it to the extreme, can be stimulating. Of course, it explains that this must always be a practice that is consensual and desired by both members. "When these practices do not generate discomfort in the person or their partner and are consensual, we cannot consider them unhealthy or pathological. S&M does not cause problems in healthy people." The only thing they must respect is the establishment of very clear limits on what is allowed and what is not, as well as some sign to know where to stop.

Why BEGME?

Begme is a BDSM brand with top quality materials manufactured 100% with three quality controls and that guarantee a completely safe process in the Fetish game.

BDSM Safety

Safety First in BDSM

Consent, communication, and safety are paramount. Our products include safety features like quick-release buckles. Never leave a restrained person unattended.

Start slow, check in often, and always have safety scissors nearby for emergency release.
