Sadomasochism is based on more than just feeling pleasure through pain. It is characterized by assuming the roles of dominant and submissive. The representation of these roles in non-sadomasochistic couples, within their erotic game and without taking it to the extreme, can be stimulating. Of course, it explains that this should always be a practice consented to and desired by both members. "When these practices do not cause discomfort in the person or in their partner and are consented, we cannot consider them unhealthy or pathological. The S&M does not generate problems in healthy people." The only thing they must respect is the establishment of very clear limits on what is allowed and what is not, as well as some signal to know where to stop.

Why BEGME?

Begme is a BDSM brand with top quality materials manufactured 100% with three quality controls and that guarantee a completely safe process in the Fetish game.
