Product description

The Penis Extender is a product for penis enlargement without surgery that stimulates the growth of the penis through the medical principle of traction, which produces effective and safe growth.

- This generates the growth of the suspensory ligament, the cavernous body and the rest of the tissues of the penis, which results in a larger penis.
- It can be used at any time of the day and at various time intervals, depending on your availability of use.
- The number of hours of use together with the traction applied by the device determine the result of the treatment. Maximum extension length: 16.5 cm
