Sadomasochism is based on more than just feeling pleasure through pain. It is characterized by assuming the roles of dominant and submissive. The representation of these roles in non-sado-masochistic couples, within their erotic game and without taking it to the extreme, can be stimulating. Of course, it explains that this must always be a practice consented to and desired by both members. "When these practices do not cause discomfort in the person or their partner and are consensual, we cannot consider them unhealthy or pathological. S&M does not cause problems in healthy people." The only thing they must respect is the establishment of very clear limits on what is allowed and what is not, as well as some sign to know where to stop.
