Product description

Longer and slimmer than our original square ElectraPads, this set of 4 uni-polar self-adhesive pads can be used for more precise stimulation across the labia, around the penis, over the perineum or anywhere else below the waist.

Because the surface area is smaller, you experience more intense stimulation that's better targeted to your most responsive areas. Connect 2 pads to a single channel on your stimulator, remove the plastic backing and press them against the desired area. You can even share sensations with your lover when you each wear a pad connected to the same channel. Not only will you feel tingles and contractions where the pad touches your body, you'll also feel them everywhere you touch one another.

- Each pad measures 1,5 cm wide x 7,6 cm long.
