Price	136.53 £
Number	70140939
Producer code	FETISHID-227108
EAN	609224031908

Product description

The sensation of E-stim pulsating through a man's cock is one of the deepest sexual pleasures he might experience in his lifetime. The intense erotic throbbing, the pre-cum dripping in anticipation of orgasm and that explosive, final release...

Electro cock rings make an amazing enhancement to foreplay and masturbation, but what if you could intensify the pleasure of your stroke by harnessing the power of electrostimulation?

ElectraStim Jack Socket is a completely unique electro sex toy that was designed especially for cock play. It combines the realistic sensations of a stroker with the addictive orgasmic feel of erotic electrostimulation.

The flexible case has 2mm inputs for connection to any ElectraStim stimulator. There are even adapters available for use with other e-stim units and TENs machines. The unique design allows sensation to travel through the realistic TPE sleeve, giving you the pleasure of a realistic stroking experience while you lose your inhibitions to that unmistakable electrosex throb. The ElectraStim Jack Socket is a men's sex toy designed to be used in combination with electro-conductive gel (included) and water-based lube (sample included).

An ElectraStim Stimulator or other e-stim device is required to create the sensations described. Takes 2mm pin connection, adapters are available.

Safety Guide

E-Stim Safety Guide

Never mix electrostimulation with other electrical devices. Use only water-based conductive gel. Limit sessions to 30-60 minutes.

Stop immediately if you feel pain or dizziness.
