ELECTRASTIM - PRESTIGE ELECTRALOOPS ADJUSTABLE COCK RINGS CAMOUFLAGE

Price	**73.89 £**
Number	**70140969**
Producer code	**FETISHID-228840**
EAN	**609224032134**

Product description

Consistently one of the most popular products in the ElectraStim range; the conductive rubber Prestige ElectraLoops have had a makeover for ElectraStim’s 20th anniversary.

Utilising hydro-dipping technology (the team at ElectraStim have been dying to experiment!), the solid aluminium adjustment choke on each loop now sports a seamless forest camouflage design that adds a fun novelty factor and a pop of eye-catching colour.

Due to the nature of the hydro-graphic process each set of loops are totally unique; showing off a different part of the camo pattern each time.

In use, the Camo Prestige ElectraLoops work in exactly the same way as the classic ElectraLoops with a unipolar connection and 6.5mm thick conductive rubber that delivers strong yet smooth and controllable sensation.

Please note that you will require a stimulator unit to power these loops (sold separately).

What's Included?

- 6.5mm thick conductive rubber loop.
- CNC machined adjustment choke made from aircraft grade aluminium billet.
- Anodized colour finish which protects the surface plus insulates the choke so the rubber loop receives all the stimulation power.
- Adjustable up to 60mm/2.35 inches in diameter.
- 2mm pins- compatible with all ElectraStim stimulators (sold separately)

Suggestions For Wear:

- ElectraStim Prestige ElectraLoops can be worn in a variety of different ways. Two of the most popular configurations are shown below; both loops worn on the shaft or one on the shaft and one around the scrotum.

As Prestige ElectraLoops are unipolar you can also combine a single loop with another attachment (i.e. pads or a butt plug) to enjoy a variety of sensations. The only limit is your imagination!

Electrode Type:

- Uni-polar for external stimulation – takes 1x 2mm pin connector. 2 ElectraLoops with metal finish are included in each pack. You will need to connect Prestige ElectraLoops to an ElectraStim stimulator to feel electro stimulation. We recommend you also purchase the electro-conductive gel to ensure you can feel sensation clearly.

Dimensions:

- Adjustable up to 60mm/2.35 inches in diameter

Materials:

- ElectraLoops are made from super-conductive rubber (6.5mm thick) with a machined aluminium adjustment choke. The unique camouflage design has been applied using a body safe hydro-dipping process which also isolates the choke and prevents it from emitting any stimulation.
