ELECTRASTIM - SILICONE FUSION KOMODO DILDO

Price	136.53 £
Number	70140946
Producer code	FETISHID-227117
EAN	609224031960

Product description

It wouldn't be an ElectraStim toy if it didn't have a versatile range of uses!

Komodo can be used as a handheld dildo, can be suctioned to a flat surface and ridden hands-free using the bespoke cradle and even worn as a strap-on.

Add to that the customisable sensations of electrostimulation and you have a toy that not only gives you a huge amount of choice in your play but that is also a great introduction to internal e-stim.

'Komodo' is the first silicone strap-on dildo in the ElectraStim range and has a wide variety of uses for both vaginal and anal electro play. Made from smooth and sleek medical grade silicone in a spicy shade of red, Komodo's striking ridged design highlights the conductive areas along the shaft for increased awareness of where the stimulation is targeted.

Versatility is the aim and Komodo can be used as a standard dildo, a strap-on, or as a riding/grinding toy; all of course with the unique sensations of electro!

Compatible with any strap on harness (sold separately) with a 1.5 inch diameter o-ring; Komodo also comes with a bespoke suction cup system that lets you use the dildo hands-free when attached to a smooth surface.

The shield-like flared base of Komodo also utilises a 'stealth' cable entry system to hide and protect the wires connecting it to your stimulator (sold separately) and provides stability during strap-on play or when using the suction cups. Thrust away to your heart's content!

Komodo is compatible with any ElectraStim stimulator unit, entirely phthalate-free and suitable for male or female users.

How To Use Komodo

Connect the dildo to your ElectraStim stimulator (sold separately) by inserting both 2mm pins into the stealth base of Komodo and the other end into the stimulator. A good coating of water based lubricant will enhance the sensations of Komodo and make them feel more pleasurable so we always recommend using your favourite brand of lube.

ALWAYS insert Komodo fully before turning the stimulation on.

Trying to insert with stimulation already applied can feel uncomfortable. Komodo can be used in multiple different ways.

Hand-held for manual thrusting during masturbation or play with a partner.

Worn in any strap-on harness (sold separately) with a standard 1.5 inch diameter O ring.

Used 'hands-free' by utilising the bespoke suction cup cradle. Komodo can then be attached to any solid, smooth surface for riding and grinding.

Dimensions:

-
- Total Length: 162mm/6.4 inches
 - Length: 139mm/5.5 inches insertable
 - Diameter at the widest point: 36mm/1.4 inches
 - Circumference at the widest point: 113mm/4.45 inches

- 2 x clear suction cups
- Storage bag

Safety Guide

E-Stim Safety Guide

Never mix electrostimulation with other electrical devices. Use only water-based conductive gel. Limit sessions to 30-60 minutes.

Stop immediately if you feel pain or dizziness.
