How to Inflate:

Do not inflate completely. To avoid overinflation, do not use an electric compressor. Instead, use a hand pump. Let sit for ten minutes so the air can distribute evenly inside the doll before fully inflating. The less air inside the doll, the less stress will be placed on it during use.

Cleaning instructions:
Rinse the doll with warm water, then gently rub with toy cleaner with your hands or a soft cloth. Avoid using rough cloths or sponges, as this could damage the material. After scrubbing, rinse again with warm water. Dry with a lint-free towel.

Storage instructions:
Deflate the doll, then carefully fold it, wrapping it in a lint-free cloth. Store in a cool, dry place out of direct sunlight.
