### Product description

The Femintimate brand presents **Intimate Exfoliant**, an intimate exfoliant designed to prepare the skin before hair removal.

Based on papaya extract and a combination of natural ingredients from different regions, **Intimate Exfoliant** promises a healthier intimate area. Softens the skin and even promotes cellular renewal. By using it regularly, you will reduce ingrown hairs between waxing sessions.

The base of this scrub is Made up of natural ingredients selected for their exfoliating properties, such as fine particles of natural origin that gently remove dead skin cells, promoting cell renewal and leaving the skin feeling renewed. In addition, it contains soothing and nourishing agents that help maintain hydration and softness of the skin, counteracting any sensation of dryness that may occur after exfoliation.

The presentation in a 50 ml container is practical and convenient for regular use, and its application is simple. The texture of the scrub is pleasant to the touch, and its natural fragrance offers a pleasant sensory experience during use.
