Product description

The Gcup menstrual cup is bell-shaped. The main advantage of the Gcup is the internal check valve. Thanks to the valve, fluid does not return to the vagina during an active lifestyle. You can do your daily activities, sports and even swim, completely forgetting about "these days." The Gcup has a soft and smooth surface, with the perfect size so you don't feel like it. Additionally, the bowls will save a significant amount compared to conventional pads and tampons. The Gcup menstrual cup is absolutely safe for women's health.
The main advantage and innovation of the Gcup is the internal structure. Inside the container there is a check valve that prevents liquid from escaping. The Gcup menstrual cup is bell-shaped, making it easy to use.
