EAN	<b>761236900730</b>

### Product description

ID Pleasure is a water-based lubricant that can create a warm and pleasant tingling sensation in the applied area.

It uses natural ingredients such as Ginkgo Biloba and red clover. You can use ID Pleasure lubricant alone or with your partner to give an extra touch to your love life.

#### What is Pleasure ID?

The lubricant has been developed on a water basis and can provide you with good support during sexual intercourse. Thanks to Ginkgo Biloba and red clover, the lubricant can provide a pleasant effect, with or without a partner. The gel can cause a tingling sensation, which many clients find very sensual and arousing. ID Pleasure is easy to use and leaves no residue. It can also be used if you use latex condoms or want to include sex toys when making love.

#### Use:

Use a small amount of lubricant first and then increase as desired. If lubricity decreases, apply more lubricant or add some water. Make sure the lubricant does not get into your eyes.

#### Ingredients

water, glycerin, propylene glycol, cellulose gum, ginkgo biloba extract, trifolium pratense (red clover) flower extract, polysorbate-20, EDTA, carbomer, PEG-90M, tetrahydroxypropylethylenediamine, methylparaben, sodium benzoate, potassium sorbate, menthol

ID has been manufacturing personal lubricants since 1993 and are experts in the field. IDs quality lubricants are specially formulated to increase personal pleasure and comfort for a memorable intimate experience. Whether used alone or with or without condoms, ID lubricants are designed to reduce friction. When using condoms, proper lubrication helps prolong the integrity of the condom and increase overall stimulation.

### Safety

#### Ingredients & Safety

All our products use body-safe, tested ingredients. Look for "hypoallergenic" and "glycerin-free" options for sensitive skin.
