INTENSE - PUMP MANUAL PUSSY VACUUM PUMP

Price	36.28 £
Number	70138329
Producer code	FETISHID-234357
EAN	8435565938291

Product description

Use this pump to increase blood flow to your most sensitive areas. Simply adjust the cylinder so you get a tight seal around your vaginal area. A high level of pressure is required for a good seal. We also recommend a water-based lubricant to help you create that necessary seal and successful pumping. Easy to position the cylinder over your desired erogenous zone, then squeeze the pump to draw blood to the area. You'll feel suction as your clitoris temporarily increases in size and sensitivity. You can release the pressure in the cylinder by pressing the easy-release valve on the bulb.

The set comes with 2 interchangeable cups, 1 hose and 1 pressure pump.

- Product diameter 8.5 cm
- Internal diameter 6.0 cm
- Phthalate free Yes

Toy Guide

Adult Toy Guide

Start with a small vibrator or bullet. Add lubricant. Clean after each use.
