Water-based lubricants are products designed to reduce friction and improve comfort during sexual activity or for other lubrication-related purposes. They are known for their safety and versatility. They are ideal for most people as they rarely cause irritation or allergic reactions. This makes them a popular choice for people with sensitive or allergy-prone skin.

These lubricants are compatible with a wide range of sex toys, latex condoms and sexual health products. They can be used in combination with any material, making them suitable for almost any sexual situation.
