### Product description

#### The Jamyjob Masturbator

**Jamyjob**Toys presents three masturbators perfect for solo use, with a partner, or to take with you anywhere. Made of TPR, they enhance the sensation of pleasure, increasing well-being during male masturbation.

Instructions for use;

Before use, apply a paraben-free, water-based lubricant such as Waterfeel or Nina Kiki.

After use, if ejaculation did not occur inside, clean it with pH-neutral soap and warm water. If ejaculation occurred inside, remove the sleeve, place it under running water, and clean it with pH-neutral soap.

Let it dry and it will be ready for use again.

- Vagina Shape
- Material: TPR
- Phthalate-Free

#### 5 BENEFITS OF MALE MASTURBATION

Masturbation is still viewed in some societies as immoral and harmful. In fact, it is almost a taboo subject, rarely discussed in social gatherings and reserved for private matters. We also shouldn't overlook some of the urban legends that circulated about male masturbation: such as that it caused sterility, blindness, or the appearance of acne. However, it is The technique produces pleasure and relaxation, among other things. Below, we show you the 5 benefits of male masturbation.

- **Prevents prostate cancer**

Prostate cancer is the most common type of cancer among men over 70. In fact, it's on the rise, as evidenced by the fact that it already accounts for 12% of new cancer cases detected in Europe. Various studies have revealed that frequent emptying of the prostate gland, achieved through ejaculation, can prevent prostate cancer. Some studies claim that those who masturbate more than five times a week have a 30% lower chance of developing prostate cancer.

- **Natural Relaxant**

The most common options for relaxation are chamomile tea, reading, yoga, or even pills. But thanks to masturbation, this quality can also be obtained, in addition to helping us overcome insomnia. Upon reaching orgasm, the male brain releases hormones such as serotonin and oxytocin, which are associated with sleep.

- **More fertility**

---

Contrary to popular belief, masturbation does not affect semen quality. Quite the opposite, in fact, as it actually improves sperm motility. This is because Because ejaculation releases residual sperm, ensuring that new sperm are healthier and younger.

- **Prevention of infections**

With each ejaculation, bacteria are expelled. Therefore, the ejaculatory ducts are cleaned, preventing the development of an infection. But in addition to noticing it in the genitals, you will also appreciate it in other areas of the body.

- **Increases happiness**

With masturbation, we secrete a series of hormones such as dopamine and oxytocin, which are associated with levels of happiness. The brain's pleasure circuits are activated, improving mood and happiness. Use Jamyjob frequently to improve your sexual performance!
