Product description

Eye Of Love: Pairing powerful pheromones with captivating fragrances, Eye of Love's mission is to give you a unique edge in all of your encounters. Whether you're working, playing, or being intimate we can all use an added advantage.

Eye Of Love: Pairing powerful pheromones with captivating fragrances, Eye of Love's mission is to give you a unique edge in all of your encounters. Whether you're working, playing, or being intimate we can all use an added advantage. Eye of Love pheromones are high potency with pheromone and fragrance to last you all day long. What can be expected then from using Pheromones?

1. People who work in areas like customer service, real estate, and cosmetology can notice higher tips, better quality interactions, and higher sales.
2. Couples can find themselves reconnecting in an entirely new way. You may feel like you are back in the "honeymoon" phase, listening more, talking more, and feeling closer again.
3. Sensual moments like enjoying massages, cuddling, and enjoying passionate kisses can become heightened.
4. First impressions or chance meetings can have a positive undertone, for instance: relaxed interactions, a general feeling of comfort, and a tendency to feel more engaged or connected.

What is the difference between Eau de Toilette or Eau de Parfum? Good question! The difference lies in the volume of perfume oil in a formula. Eau de Toilette contains between 5-9%, while Eau de Parfum contains more, usually about 8-14%. Eau de Parfums, therefore, last longer and have a more intense smell.

Tips

Application Tips

Apply to pulse points (wrists, neck, behind ears). Do not over-apply – a little goes a long way.
