Product description

The ONE LOVE perfume, created for women, is perfect for special moments where you want to stimulate passion and feelings between you. Its fresh aroma of citrus and the mixture of pheromones produces unparalleled sensations. Turn those moments into something special and share your love with your partner.

Apply the perfume to the wrists, behind the ears and near the clavicle. If you want to increase the natural function of pheromones, apply a little below the navel.

EOL men's line pheromone perfumes are made with today's woman in mind. With a sober and elegant design packaging, the fragrances are also suitable for any woman and it is possible to choose one depending on the time of day in which you want to use it.

- Designed for women hoping to attract men, One Love Pheromone Perfume is refined femininity at its peak. Celebrate your femininity and lean into your soft elegance with top notes of citrus combined with floral notes of jasmine, orris, and rose, all blended with a beautiful base of musk, ambergris, and vanilla.

You will find the confidence to increase your intimacy with your partner and romance will blossom wherever you go. The goal is to enhance connection, and One Love will help you achieve it with a precise combination of scents and pheromones designed to capture your attention. Your partner will see your warmth rise to the surface and will happily fall in love with you over and over again.

Apply every day, every night and anytime on the wrists, behind the ears and on the back of the knees for a glossy finish.

Tips

Application Tips

Apply to pulse points (wrists, neck, behind ears). Do not over-apply – a little goes a long way.
