Product description

Black Stone Spray is specially formulated to prevent a premature ejaculation. Many men come faster than they would like. A common problem, which is uncomfortable for both partners.

The most sensitive areas of the penis will temporarily be slightly numbed due to Black Stone Spray. This causes an orgasm to be delayed.

The ideal spray for long lasting and intense sexual intercourse. Black Stone Spray has a light anesthetic effect on the skin of the penis, making it therefore temporarily less sensitive. The climax will be delayed to provide longer lasting and more enjoyable sexual intercourse.

Brand characteristics

Brand characteristics: selected COBECO PHARMA products available at Sforne with discreet delivery and clear product information.

Delay Guide

Delay Guide

Start with 1-2 sprays. Test effect before increasing. Wash hands after application.

Not for everyone. Consult doctor if premature ejaculation is persistent.
