Product description

Andropenis Mini is a medically prescribed penis enlargement device suitable for men with penises smaller than 8 cm (3.2 inches) when erect.

- For Andropeyronie and Andropeyronie (Surgery Edition), your penis must measure at least 8 cm when erect.
- The springs are made of stainless steel and the axles are made of surgical aluminum.
- You must be between 18 and 65 years of age.

All of our medical devices and penis enlargement devices must be used with the penis in a flaccid state. Depending on the model, they can be used between 4 and 9 hours a day, taking a break when necessary.

Each model applies the traction principle, but in a different way. When using Andropeyronie, the patient can control the direction of traction in order to apply greater traction force on one side of the penis, thus correcting the curved penis. In the case of Andropeyronie (Surgery Edition), a more moderate unidirectional traction force is sufficient to prevent penile shortening.

Andropenis Mini should be used like penis extenders, with a slight adaptation to the upper support

Includes;

- Medical assistance during treatment
- Androshafts®: Aluminum
- Androsilicone®: 2 units
- Androcomfort® Band: 2 units
- Androtop® for Androsilicone®: 2 units
- accept accept accept

- Androring®: 2 units
- Instruction CD in 27 languages (for computer use)
- Instruction book in 8 languages
- Quick guide
- Free eBook "100 Sex Tips"

There are many men looking for a male enhancement product that really works. We understand your frustration in the midst of a market full of fake products and broken promises. Our male enhancement products are proven effective and professionally approved by leading urologists.

The Andropenis Mini works the same as the rest of the penis extenders, but the mini is suitable for men with a penis size less than 8 centimeters in erect length.

It is easy to use and medically tested. Through the application of traction pressure, the Andropenis Mini stretches the penis, forming new cells, resulting in penis lengthening.

Use the male enhancement product 4-9 hours daily, taking a break when necessary. Realize the wonders that this product offers. The penis extender helps those who want to enlarge their penis, those with Peyronie's disease, and those who want to reverse the effects of reduction surgery.

Our male enhancement device is made of stainless steel and surgical aluminum. There is no need to worry about allergies or discomfort while using the penis extender.

Male sex enhancement is a reality. It is tested and offered to you by the experts at Andromedical.

It's the moment! Start the treatment and you will see results forever!
