Product description

Andropeyronie is a medically prescribed device for the correction of penile curvature. It is effective in case of Peyronie's disease, congenital curvatures, acquired curvatures, etc.).

- For Andropeyronie and Andropeyronie (Surgery Edition), your penis must measure at least 8 cm when erect.
- You must be between 18 and 65 years of age.
- The springs are made of stainless steel and the axles are made of surgical aluminum.

Penis enlargement devices should be used with the penis in a flaccid state. Depending on the model, they can be used between 4 and 9 hours a day, taking a break when necessary.

Each model applies the traction principle, but in a different way.

When using Andropeyronie, the patient can control the direction of traction in order to apply greater traction force on one side of the penis, thus correcting the curved penis. In the case of Andropeyronie (Surgery Edition), a more moderate unidirectional traction force is sufficient to prevent penile shortening.

Andropenis Mini should be used like penis extenders, with a slight adaptation to the upper support.

Includes;

- Medical assistance during treatment

It is not necessary to live with the problems derived from Peyronie's disease. Andromedical offers a penis enlargement device.

Our device is easy to use. The penis enhancement product can be used 4 to 9 hours daily. Each product is designed to use the principle of traction but in different ways, this device is designed to address the curvature of Peyronie's disease.

Controlling the direction of traction to apply stronger force on the side of the curvature helps the penis to straighten. Peyronie's is not a life-threatening disease, however, it influences your sexual life, and therefore correction is very important. Those left untreated threaten the health of your penis and the future of your sex life.

A real, proven penis enlargement device is here, brought to you by the experts at Andromedical

It's the moment! Start the treatment and you will see results forever!
