Product description

Sensual Comfort! Enjoy the ease of a water-based lube and the slickness of a silicone lube with ID Silk®! Innovation has always been one of our greatest qualities here at ID Lubricants®.

We give credence to this statement with every one of our products. Offering a hybrid lubricant that would combine the best parts of water-based and silicone lubricants was a project we undertook and surpassed with our specially blended formula. This formula would become one of the most revolutionary lubricants we offered to date. Try it for yourself and see the benefits that this lube can have in your bedroom firsthand. This formula is slippery and smooth with a great consistency and a feel as natural as you could ever imagine. Non-tacky and long-lasting, ID Silk® effectively blends the best qualities of both types of lubricants.

ID Silk ® brings to you the smoothness you've come to expect from silicone products and the natural feel present in water-based lubricants. It is sure to give you the closest feeling to natural lubrication while maintaining the perfect amount of slip. This is a fantastic lube for masturbation or intimate moments with your partner. Indulge your sexual appetites with the soft pleasurable sensation that can only be found in our personal lubricant.

ID Silk® leaves skin feeling supple and smooth after use as its blended formula includes hydrolyzed silk. Hydrolyzed silk contains strong hygroscopic properties that allow it to retain an incredible amount of moisture. As with all of our products, this lubricant is also extremely easy to clean after each use.

ID Silk® is non-staining and compatible with latex products making play time spent with your latex toys worry free moments. This is a silicone and water blended wonder that you are going to want to add to your collection. Additionally, ID Silk® is excellent for sensual massages!

Lube Guide

Water-Based Lube Guide

Water-based lubes can dry out during long sessions – reactivate with a few drops of water or saliva. They leave no stains and wash off easily with water.

Our selection includes hypoallergenic, pH-balanced, and organic options for sensitive skin.
