The feedback was 100% positive, all have proven to be the best product on the market.

Pump Addicted helps to achieve erection in a more simple way using a vacuum system that causes the blood to concentrate in the penis when it is still flaccid. The erection is achieved and maintained by a comfortable and hermetic seal at the base of the body, just at the junction of the penis with the pubis, thanks to which blood is kept in the trunk. Thanks to the sleeve, the seal is firm, comfortable and narrow without squeezing.

In addition, all Pump products can be combined with the launch of Pump vibrating bullet to increase the sensation of pleasure.

As if that were not enough, it can also be combined with some models of the Pump series the sleeve sleeve masturbadora pleasure sleeve, available in two sizes, this fabulous accessory turns your favorite Pump Addicted into a masturbator, but if that were not enough to make the vacuum penis size is multiplied by 5 visually a really attractive optical effect when you use Pump
The doctors see the penis pump is an effective and economical treatment for erectile dysfunction and they declare that the prolonged use of devices will permanently increase the size of the penis.
Pump RX9 improves your performance thanks to the built-in calibrator. At a more advanced level the calibration system is necessary to optimize performance and have the guarantee of real pressure.
