## Product description

Stertoy is a complete accessory for the sterilization of vibrators, sex toys, mobile accessories, personal items, baby pacifiers, and any accessory you need to sterilize.

Sterilization is carried out by means of a state-of-the-art ultraviolet lamp that destroys the DNA structure of the bacteria immediately.

The main application of the ultraviolet sterilizer is disinfection.

UV radiation constitutes one of the fringes of the electromagnetic spectrum and has higher energy than visible light. Irradiation with UV rays of the germs present causes a series of damages in its DNA molecule, which prevents cell division and causes its immediate disappearance.

The stertoy ultraviolet sterilizer is an advanced disinfection equipment. Ultraviolet UV rays alter the DNA of the microorganisms (viruses, bacteria, protozoa, etc.) present, eliminating them, or genetically inactivating them, to prevent their reproduction. The efficiency of UV in eliminating viruses and bacteria is 99.9%; Furthermore, UV is more effective than chlorine against viruses and protozoa.

The ultraviolet sterilizer equipment consists of a sanitary box with a fully mirror polished interior. Inside the box there is another quartz tube and inside the latter the ultra violet radiation lamp.

These are some of its many benefits:

- Provides disinfection without the use of chemicals.
- Reduces bacteria, viruses and protozoa by 99.99%. and it is perfect for sex toys since being with our body requires an added disinfection.
- Easy to operate and maintain.
- UV does not alter the taste, smell, color and pH of the water.
- UV does not require the addition of chemicals. The UV is compact, easy to install and requires no maintenance.

Buying this reference you get free 1 Toy Cleaner Waterfeel

It is a disinfectant hygienic spray, to produce a deep cleaning effect on erotic toys of all shapes and surfaces.

Compared to other disinfectants on the market, Waterfeel Toy Cleaner has been specially designed with specific ingredients for cleaning erotic material.

Its compound applied to toys does not allow them to generate fungi, bacteria or viruses, thus guaranteeing disinfection and cleaning of the device.

It has a fresh and clean aroma and thanks to its powerful spray it allows cleaning the most hidden spaces of toys.

Instructions for use;

Depending on the size of the toy, 5 or 6 sprays are enough all over its surface, let it act for a couple of minutes and then rinse with water and dry it well.

characteristics

- Measurements: 25.9 x 14.9 x 9.1 cm

Brand characteristics: selected STERTOY products available at Sforne with discreet delivery and clear product information.

## Cleaning Guide

### Cleaning Guide by Material

Silicone: soap & water, boiling, or bleach solution. Glass/Metal: soap & water, boiling, or dishwasher (top rack). TPE/TPR: soap & water only (no boiling). ABS plastic: soap & water only.

Never use silicone lube on silicone toys – use water-based lube instead.
