TENGA - FLIP 0 ZERO ELECTRONIC VIBRATION

Price	**311.93 £**
Number	**70136203**
Producer code	**FETISHID-226986**
EAN	**4560220555903**

Product description

A new generation of Flip Zero is ready to roar! The vibrations inside the elastomer sleeve give your hands an otherworldly feeling. This is possible thanks to another first designed by Tenga; two 'vibrating cores' housed within the elastomer. Enjoy the latest version of Tenga in terms of vibratory pleasure.

- - Includes USB cable.
- - Charge while drying.
- - The lamp will turn on during charging.
- - Product size; 70x80x180mm
- - Packaging size; 108x121x206mm
- - Weight; 720 grams
- - Execution time; approximately 40 min.
- - Loading time; approximately 90 min.
- - 5 vibration patterns.
- - Waterproofing; Product body and sliding arms: fully waterproof (IPX5). The charging base is not waterproof, but small amounts of water during drying do not cause problems (IPX1).
- - Parts included; Product body, sliding arms, transparent case, charging base, USB cable, two real hole lotion bags (2x10 nl) and user manual.
- - 1 year warranty.

Is this product reusable?
Yeah! The FLIP ZERO EV is completely washable and can be used several times. While the item comes with a sample bag of lubricant, we recommend TENGA HOLE LOTION for later use.

Is this product electronic?
Yeah! The FLIP ZERO EV can be used both manually and with its electronic vibration! The FLIP ZERO EV houses two vibration cores within the elastomer sleeve, meaning rumbling vibrations flow throughout the item for direct stimulation. The vibration cores are at opposite ends of the item, so the vibrations come from all around you.

What variations of vibrations exist?
There are five varieties of vibration in total.
After turning on the element, pressing the button will cycle through the following modes: Low > Low. High > Pulse > Alternating > Random

Is the item fully washable?

- DO NOT submerge the charging base. This could cause electrical damage or electric shock.
- Do not wash the item in water above 50 degrees Celsius (122 Fahrenheit), as this could distort or damage the elastomer sleeve.
- If you want to wash the item with soap, use a mild or neutral soap. Alcohols or very acidic/alkaline soaps can damage the elastomer sleeve.

- Make sure the item is completely dry before storing to prevent mold or bacteria buildup.

Can I use the charging base to dry the item while it is wet? A small amount of water dripping from the previous element should not be a problem.
However, do not completely wash the charging base or get it completely wet.

- DO NOT submerge the charging base. This could cause electrical damage or electric shock.
- Please refrain from charging the item in the bathroom or near any water source that may cause the charging base to become submerged.
- Do not place anything other than the body of the FLIP ZERO EV or the sliding arms on the charging base.

Can I carry the item while I dry it?
Yeah! After washing, dry the body and sliding arms of the FLIP ZERO EV with a dry cloth.
Connect the charging base. Then, place the sliding arms on the charging base and place the open body on the sliding arms.
Leave in a dry and well-ventilated place.

- Please refrain from charging the item in the bathroom or near any water source that may cause the charging base to become submerged.
- Make sure the item is completely dry before storing to prevent mold or bacteria buildup.

Does the item come with lotion?
There are two sample bags of our [REAL] HOLE LOTION included with every FLIP ZERO EV. For further use, we suggest our HOLE LOTION Series.

Care Guide

Masturbator Guide

Use lubricant for best sensation. Clean after each use (soap and water). Air dry completely before storing.

Heating the sleeve improves realism. Rotate between sleeves to avoid boredom.
