### Product description

This chewing gum is an ideal supplement that helps to resist external aggressions, contributing to the normal functioning of the immune system.

It is composed of Vitamin C, Vitamin H, Vitamin D, Betacarotene, Lycopene and Green Tea.

WUG Multivit GUM can be found in packs of 10 units.

WUG CHICLE MULTIVIT GUM is a food supplement, in chewing gum format, sugar-free and with a pleasant tropical flavor. It is an ideal supplement that helps to resist external aggressions, contributing to the normal functioning of the immune system. It is composed of Betacarotene, Lycopene, Green Tea Green and Vitamins C, D and H that contribute to the protection of cells against oxidative damage.

WUG CHICLE MULTIVIT GUM does not need water or digestion, it can be carried anywhere and only weighs 2.4 grams. You can find it in packs of 10 units.

### Benefits

It is Indicated for the normal formation of collagen for the functioning of blood vessels and bones, protects cells from premature aging and strengthens the immune system.

### ACTIVE INGREDIENTS

- Betacarotene

Betacarotenes are antioxidant components that are precursors of Vitamin A. They have properties that care for the skin, keeping it brighter and protecting it from free radicals. Beta-carotene is the main source of safe vitamin A, essential for normal growth and development, immune system function and vision.

- Vitamin C

Vitamin C prevents damage to cell DNA from exposure to free radicals and solar radiation. Vitamin C is involved in collagen synthesis, which improves the appearance of the skin, preventing the appearance of wrinkles and, in turn, strengthens bones, ligaments and tendons.

- Vitamin D

Vitamin D plays an important role in maintaining organs and systems through multiple functions, such as: regulating calcium and phosphorus levels in the blood, promoting intestinal absorption of these from food and calcium reabsorption at the renal level. With this, it contributes to bone formation and mineralization, being essential for the development of the skeleton.

- 
- Vitamin H

Also called Biotin, it helps relieve muscle pain, dermatitis and strengthens nails and skin.

- Lycopene

Lycopene has antioxidant properties that protect cells from oxidative stress caused by free radicals, reducing tissue damage and aging.

- Tea Green

Thanks to its antioxidant power, it prevents aging, improves cognition and neutralizes the spread of free radicals.

## **HOW TO USE**

- Chew for at least 10 minutes so that the active ingredients are assimilated.
- Recommended daily dose of up to 3 pieces of gum.
- If the individual's weight is greater than 80 kg, it is recommended to take 2 units.
- The effects may vary depending on each individual, depending on their weight, age, or health status.

## **WHY WUG MULTIVIT**

- Promotes cell renewal
- Contributes to bone formation and mineralization
- Improves cognitive processes such as memory, attention and concentration
- Faster assimilation
- Minimal caloric intake
